The Student Published Admission Number (PAN)

Poynton High School has an agreed Published Admission Number (PAN) of 246 in Years 7-11.

If Poynton High School is named in an Education Health and Care Plan (EHCP), the school has a duty to admit the child and the number of available places in the normal admission round will reduce accordingly.

The Sixth Form welcomes applications from Year 11 students currently at Poynton High School and students wishing to join from other schools. All current Year 11 students at the school will be guaranteed a place subject to minimum entry requirements - these can be found at <https://www.phs.cheshire.sch.uk/sixthform/entry-requirements>

A number of 'external' places are available each year to accommodate a growing number of students wishing to apply from other schools in the area. As a guideline for external applicants, the school can admit 50 external applicants into Year 12 year each year.

Admissions Criteria

Poynton High School Follows the Cheshire East Admissions Policy it can be found at https://www.cheshireeast.gov.uk/schools/admissions/admission_arrangements/admissions-policies.aspx

Below are the 5 Criteria points Cheshire East use:

After allocating places for any children with an Education, Health and Care Plan naming the school, we put children into 5 categories:

1. Children who are in local authority care or have previously been in care.
2. Brothers and sisters living in the same household as children already in the school who expect to stay at the school for the next school year. This includes foster and adopted brothers and sisters, step-brothers and sisters, and half-brothers and sisters.
3. Children living within the school's catchment area.
4. For high schools, children who are currently pupils at one of the primary schools the high school works with as a feeder school.
5. Children living nearest to the school as measured in a straight line by the National Property Gazetteer.

Where there are not enough spaces for children who live the same distance away (for example, in the same block of flats), we decide by a random allocation tie-breaker.
